EDUCATION

The University of British Columbia <i>Master of Science in Computer Science; 4.0 GPA</i> Awarded the UBC Okanagan Graduate Research Scholarship in recognition of academic achievement	Sep 2024 – Apr 2026 (Expected) Kelowna, BC
Trent University <i>Bachelor of Science Honours in Computer Science</i> Named to the Dean's Honour Roll	Sep 2019 – Apr 2023 Peterborough, ON

EXPERIENCE

Graduate Student, Software Developer and Data Scientist <i>BC Cancer</i> - Conducting research in medical imaging analysis for early detection of lung and breast cancer - Engineering pipelines to de-identify (pseudonymize) patient data to enable future ML model development	Sep 2024 – Present Kelowna, BC
Graduate Student Advisory Council Member <i>The University of British Columbia</i> Advocating for graduate education and initiatives on campus as the faculty of Science representative to the Dean	Oct 2024 – Present Kelowna, BC
Solutions Architect, Data and AI <i>IBM</i> - Developed custom demos, proof of concepts, workshops, and MVPs for clients, presenting to organizations or individual executives. Covered data management, data fabric, and generative AI product portfolios - Exceeded 2023 quota by over 450%, achieved top 1% for yearly learning hours, and invited to IBM's Golden Circle 2024 Promoted after 9 months to oversee territory outside of Ontario (MB, SK, NS, NB, NL, and P.E.I.)	Jun 2023 – Aug 2024 Toronto, ON
Software Developer Intern, Full-Stack <i>IBM</i> - Collaborated in an Agile development team to build automation and productivity tools for sales enablement - Began first full-time internship in summer 2020 and subsequently asked to return for student-on-call positions and two additional summer internships, working with larger teams each term - Work from 2020 to 2022 culminated in an application that now serves as IBM's learning platform, adopted by over 14,000 sales professionals and 800 executives worldwide	May 2020 – May 2023 Markham, ON
Undergraduate Grader, Computer Science <i>Trent University</i> - Graded assignments for 200 undergraduate students in C# programming - Provided detailed, constructive feedback to help students improve coding practices, and offered individual help upon request	Jan 2022 – Apr 2022 Peterborough, ON

PROJECTS

Avionics System, SRAD Flight Computer <i>C++, Arduino, ICs, Git</i> - Subteam of the UBC Aerial Robotics and Rocketry Club, convening weekly to plan and solve new problems collaboratively - Developing a custom avionics system for telemetry and descent control of high-power rocket during Launch Canada 2025	Oct 2024 – Present
Weather Web Application - SkySage ☑ <i>Python, JavaScript, RestAPIs, MySQL, GCP, Git</i> - Final project for UBC's Software Engineering course: provides current weather and forecasts trends using LLMs - Worked cohesively as a team of four, implementing Agile practices to develop the project in six weeks, producing over 80 Git branches, 1,050 commits, and 120 source code files totaling 17,000 lines of code. The project earned a final grade of 99%	Nov 2024 – Dec 2024
Interactive Shell - IntelliShell ☑ <i>C, Unix, LLMs, Git</i> - A Unix shell written in C with all standard features, augmented with generative AI to help users learn the command line linterface. Invalid commands are processed by a large language model, which summarizes errors and suggests fixes. Won 3rd place at UBC's AI for Social Good Hackathon	Sep 2024
Reinforcement Learning Tutorial ▶ <i>Python</i> - Developed a Q-learning program for pathfinding in first-year university, along with a tutorial video to educate others - Used no ML libraries: the algorithm and underlying equations were implemented manually	Oct 2019

PROFICIENCIES

Technical Skills: Parallel Computing, Applied Computer Vision, Deep Learning Architectures, Relational Databases, NoSQL Databases (MongoDB), Data Pipelines, Medical Informatics, DICOM Standard, Unix/Linux, Fault Tolerance, Telemetry

Software Engineering: Version Control (Git), Agile, Kanban, TDD, Cloud Deployment, Backend, MLOps, CI/CD, REST APIs

Languages: Python, MATLAB, R, C, CUDA, Arduino, C#, Java, JavaScript, HTML, CSS, PHP, SQL, MIPS Assembly, LaTeX

Developer Tools: Docker, GitHub Actions, AWS, IBM Cloud, .NET Framework, Jupyter, Jira, Trello, Markdown

Soft Skills: Technical Writing, Technical Sales, Client Relations, Public Speaking, Teaching, Mentorship, Adaptability
