EDUCATION

The University of British Columbia

Sep 2024 – Apr 2026 (Expected)

Master of Science in Computer Science; 4.0 GPA

Kelowna, BC

- Awarded the **UBC Okanagan Graduate Research Scholarship** in recognition of academic achievement

Trent University

Sep 2019 – Apr 2023

Bachelor of Science Honours in Computer Science

Peterborough, ON

- Named to the Dean's Honour Roll

EXPERIENCE

Graduate Student, Data Engineer

Sep 2024 – Present

BC Cancer

Kelowna, BC

- Conducting research in medical imaging analysis for the **BC Lung Screening** and **Breast Cancer Screening** programs, collaborating with radiologists, medical physicists, and data scientists
- Engineering pipelines to de-identify and curate clinical CT and mammography datasets to enable future AI model development and performance evaluation

Graduate Student Advisory Council Member

Oct 2024 – Present

The University of British Columbia

Kelowna, BC

- Advocating for graduate education and initiatives on campus as the faculty of Science representative to the Dean

Solutions Architect, Data and AI

Jun 2023 – Aug 2024

IBM

Toronto, ON

- Developed custom demos, proof of concepts, workshops, and MVPs for clients, presenting to organizations or individual executives. Covered data management, data fabric, and generative AI product portfolios
- Exceeded 2023 quota by **over 450%**, achieved **top 1%** for yearly learning hours, and invited to IBM's Golden Circle 2024
- **Promoted** after 9 months to oversee territory outside of Ontario (MB, SK, NS, NB, NL, and P.E.I.)

Software Developer Intern, Full-Stack

May 2020 – May 2023

IBM

Markham, ON

- Collaborated in an Agile team to build automation and productivity tools, culminating in an application now serving as IBM's learning platform for over **14,000** sales professionals and **800** executives worldwide
- Completed three internships from 2020 to 2023, **asked to return** each term to take on expanded responsibilities with larger teams

Undergraduate Grader, Computer Science

Jan 2022 – Apr 2022

Trent University

Peterborough, ON

- Graded assignments for **200** undergraduate students in C# programming
- Provided detailed, constructive feedback to help students improve coding practices, and offered individual help upon request

PROJECTS

CT De-Identification Pipeline | C#, DICOM, .NET

Jan 2025 – Present

- Building applications to collect, de-identify, and store lung screening CT data from all BC health authorities, producing a research-ready DICOM dataset for AI model development

Deep Learning Pipeline: Jersey Number Recognition 🤖 | Python, PyTorch, OpenCV, Git

Jan 2025 – Apr 2025

- Final project for UBC's Deep Learning course: Improve a published multi-stage deep learning pipeline for the SoccerNet Jersey Number Recognition Challenge using PARSeq, ViTPose, and a custom ResNet-34 legibility classifier.
- Achieved the highest EvalAI challenge accuracy of **86.04%**, earning the **top grade** in the class

Interactive Shell - IntelliShell 🤖 | C, Unix, LLMs, Git

Sep 2024

- A Unix shell written in C with all standard features, augmented with generative AI to help users learn the command line linterface. Invalid commands are processed by a large language model, which summarizes errors and suggests fixes.
- **Won 3rd place** at UBC's AI for Social Good Hackathon

CONTRIBUTIONS

Preparing CT Imaging Datasets for Deep Learning in Lung Nodule Analysis 🤖

Aug 2025

- A report on CT dataset preparation methods for lung nodule detection, replicating preprocessing pipeline steps using BC Cancer lung screening data and evaluating their impact on downstream deep learning model development

De-Identification of Medical Imaging Data 🤖

Apr 2025

- A literary review of de-identification techniques for medical imaging data, analyzing methods that remove patient-identifying information while preserving data utility for clinical research
